

Plasti 330

Roll laminator with adjustable anti-curling device

COD. DPG330M

DESCRIPTION

Reel laminator with hot rollers to be used both for single or double side lamination jobs. Perfectly flat single side lamination is granted by adjustable anti-curling device. 1000 mt OPP film rolls can be installed on the upper reel holder so to save money on purchase of bigger rolls. Independent control of heating on both rolls so to preserve back print in case of single side lamination. Adjustable film tension with side clutch. Long lasting silicone rollers for better heat distribution. IR contactless temperature sensors measure the actual temperature on top and bottom roller for more accurate temperature set. Made in Italy PCB integrated with MSC® Interface. Optional micro-perforator on top lamination film can be installed in order to facilitate manual separation of OPP single side laminated sheets.

TECHNICAL SPECIFICATIONS

Max paper width: 360 mm

Max laminating film width: 340 mm

Max laminating speed: 1.6 m/min.

Max temperature: 170°C

Max working thickness: 5 mm

Film thickness: 25 - 250 micron

Pressure adjustment: manual

Reverse function: yes

Control system: MSC® Interface

Power supply: 230 V - 50/60 Hz

Power consumption: 700 W

Dimensions: 670x440x310 mm

Weight: 33 kg
