

Plasti 635

Roll laminator - 635 mm laminating width

COD. DPG635

DESCRIPTION

Wider version of the Plasti 330 roll laminator. Double side laminator or single laminator thanks the independent lower roller heating system. Despite Plasti 330, this version does not include de-curling bar as it's mainly focused to double side lamination purposes. Independent control of heating on both rolls so to preserve back print in case of single side lamination. Adjustable film tension with side clutch. Long lasting silicone rollers for better heat distribution. IR contactless temperature sensors measure the actual temperature on top and bottom roller for more accurate temperature set. Made in Italy PCB integrated with MSC® Interface.

TECHNICAL SPECIFICATIONS

Max paper width: 650 mm

Max laminating film width: 635 mm

Max laminating speed: 1.6 m/min.

Max temperature: 170°C

Max working thickness: 5 mm

Film thickness: 25 - 250 micron

Pressure adjustment: manual

Reverse function: yes

Control system: MSC® Interface

Energy saving function: yes

Power supply: 230 V - 50/60 Hz

Power consumption: 1.800 W

Dimensions: 970x490x390 mm

Weight: 38 kg
